MORDILLO

Simply known as MORDILLO, Guillermo Mordillo is one of the world's greatest cartoonists. Famous for his humorous, colorful, wordless depictions of love, football, golf and long-necked animals in everyday and absurd situations, his work is a mastery of design simplicity coupled with complexity of meaning over decades of experience and development.

PUZZLE COLLECTIONS

Puzzles in Modular Boxes

This is a new alternative in packaging in the Clementoni puzzle line. The same size puzzle, the same great quality in a smaller retail box.

These puzzles are designed to fit neatly on standard 48" wide shelves. They are less cost to ship because the **case pack is 40% less dimensional weight than our standard cases** for 500 piece puzzles and less than half the dimensional weight of our standard 1000 piece puzzle boxes.

Less packaging materials and lighter shipping weight also makes these more environmentally friendly. **Retailers can also fit up to 33% more retail value per shelf** with these smaller, modular boxes. Puzzles in modular packaging are only available in select 500 and 1000 piece puzzles.

ACTION & REACTION®

The Action Reaction line of products provides endless fun and stimulates creativity.

It is a unique scientific kit to learn the principles of physics, track design and experiments with gravity, forces and levers by using the several parts and accessories provided.

Action Reaction is a modular system. The range includes products which allow the child to create amazing routes and which can be personalized also using objects available at home, perfect to maximize the playing activities and stimulates the imagination!

75067

Action & Reaction - Glow Effect

~NEW~

- The swirling Action & Reaction circuits are now enriched with amazing effects for creating a sensational effect!
- You can use the transparent tracks and glow-in-the-dark balls to create some amazing routes with fantastic special effects!
- Create thrilling routes with the suspended bridge, double up the circuits with branch-offs and race through spectacular swirls with the spiralling tracks!
- All the circuits can be customized also using household objects, allowing kids to unleash their imagination.
- The illustrated manual will guide children in creating circuits with growing levels of difficulty, offering plenty of ideas to complete the tracks and introducing them to physics.
- 17.8" x 12.2" x 2.8"

8+

8 005125 750672

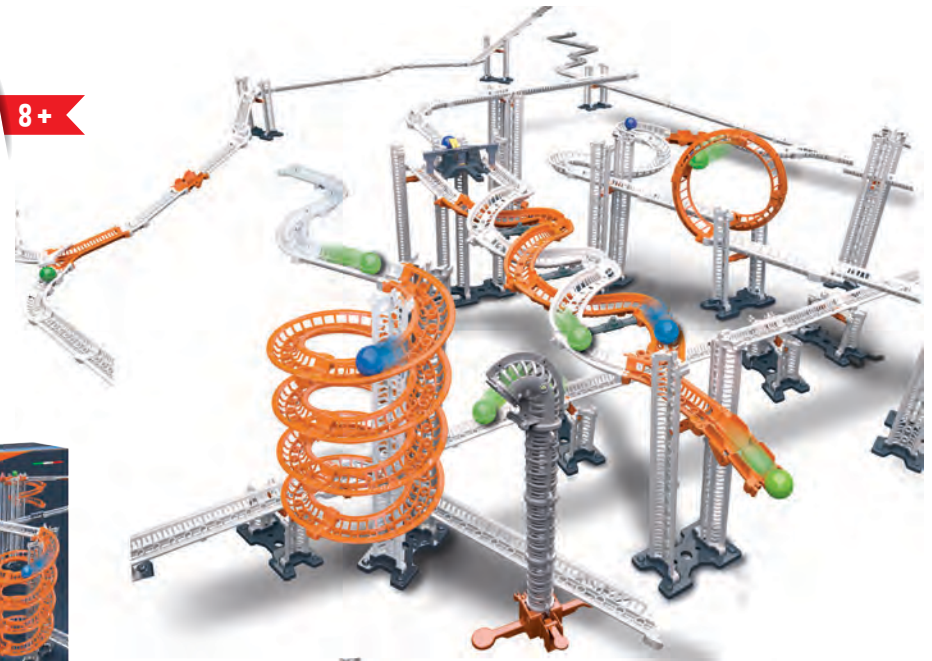

75062
Action & Reaction - Speed Race

8+

An incredible scientific kit for building never-ending circuits with surprising effects! Contains plenty of special pieces for creating never-ending routes that can also be personalized with household objects for boundless creativity! Challenge the laws of gravity with the loop-the-loop, duplicate the routes with turn-offs and create incredible special effects with the spiral! The manual will help children to learn about the principles of physics, while providing creative ideas for building circuits with growing levels of difficulty.

- 130 pieces
- Double launcher
- Loop-the-Loop
- Spiral tracks
- Many other unique features
- 18.9" x 13.6" x 3.5"

61793
Action & Reaction - Starter Set

8+

- A truly unique science kit for discovering the principles of physics in an easy and fun way!
- Use the accelerator to shoot the marbles down the track and defy the laws of gravity with the loop-the-loop!
- The manual will guide you step-by-step through endless fun!
- 16.5" x 10.9" x 2.4"

61730
Action & Reaction - Chaos Effect

8+

- An incredible scientific kit to build circuits with surprising never-ending effects!
- Lots of pieces and special accessories to create an unlimited number of routes that can be personalized with common household objects ... to unleash your imagination and trigger the chaos effect!
- Challenge the laws of gravity with the funnel, duplicate the routes with turn-offs and create unexpected effects with the hatch, suspension bridge and guard rail!
- The illustrated manual will guide the child in creating ball runs with growing levels of difficulty, offering plenty of ideas to complete the tracks and introducing them to physics.
- 18.9" x 13.6" x 3.5"

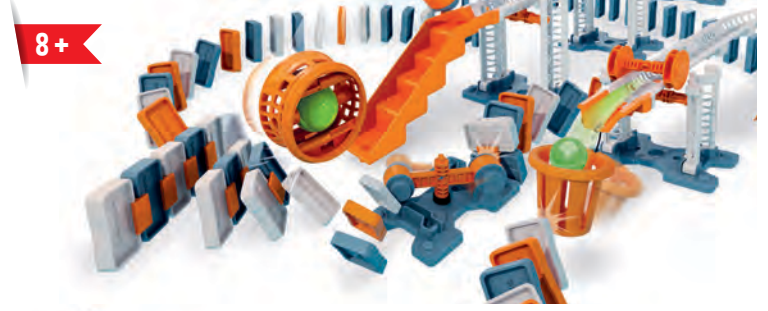

59305
Action & Reaction - Domino Effect

- A new special version of Action & Reaction for guaranteed fun!
- Lots of dominoes to arrange as you like and special pieces to build new tracks with stunning effects.
- Adjust the dominoes to make them roll along the tracks, connect the ladders to make the tracks rise, and connect the dominoes to form maxitiles and make them fall!
- The set contains more than 150 pieces, including stairs, two "ball rollers", 75 "dominoes", four balls (two different weights), and instructions on how to build play tracks with increasing difficulty and lots of tips on how to unleash your imagination.
- Go crazy with this fun Action & Reaction set, line up the dominoes and make sure a marble hits them so that they all fall over. Let your imagination run wild and create your dream circuit.
- Add to your existing sets and make even bigger and more exciting circuits.
- 16.4" x 10.9" x 2.4"

19265
Action & Reaction - Cross Road & Glow Effect

- A new spectacular Action & Reaction kit with an astounding effect: the marbles glow in the dark!
- The transparent tracks make the glow-in-the-dark effect of the marbles even more eye-catching and children can embark on stratospheric challenges in the dark as well!
- Tracks can be made even more exciting with an expansion kit that adds crossover tracks, a junction and double start!
- An engaging game that stimulates creativity and resourcefulness, introducing children to the principles of physics in an easy fun way.
- 12" x 9.4" x 2.3"

19216
Action & Reaction - Elevator

The kit contains a special manual "lift" to move the balls up to a higher level. The lever at the bottom of the system just needs to be pressed to send the ball upwards.

- 12.0" x 9.6" x 2.3"

19166
Action & Reaction - Musical Tracks

- Physics has never been so astonishing! A truly unique supplement kit with 5 special musical tracks to create ball runs with a decidedly original effect!
- The musical tracks have special plates that, when struck by the ball along the route, play different notes like a real xylophone!
- Build your circuits and defy the laws of physics... your imagination is boundless and so is Action and Reaction!
- 12.0"x 9.6" x 2.3"

19167
Action & Reaction - Crossroads & Accessories

- A fantastic kit compatible with the entire Action and Reaction range to create even more astonishing circuits and embark on breathtaking challenges!
- With the fork you can split your tracks, change the direction of the balls and challenge the force of gravity!
- A perfect game to experiment with the basics of physics in an engaging and truly creative way!
- 12.0" x 9.6" x 2.3"

19168
Action & Reaction - Spiral, Trapdoor, Guardrail

- Launch yourself into a blazing whirl of fun and create your routes using hatches, guard rails, spirals and lots of other accessories!
- With this kit you can add some astonishing effects along your routes: use the hatch to make the ball fall and modify its path, or the fantastic spiral-shaped track to create mind-boggling routes!
- A play kit compatible with the entire Action and Reaction range designed for adding a unique touch to your routes.
- 9.1" x 7.1" x 2.8"

19115
Action & Reaction - Loop of the Loop

- A new expansion kit compatible with the entire Action-Reaction range so you can create even more spectacular circuits!
- Construct thrilling circuits, defy gravity with the incredible loop-the-loop and watch as your marbles speed off at high velocity!
- Fire up your imagination and create even more exciting runs!
- 9.1" x 7.1" x 2.8"

19116
Action & Reaction - Trampoline

- A new expansion kit compatible with the entire Action-Reaction range so you can create even more spectacular circuits!
- Construct thrilling circuits, defy gravity with the incredible loop-the-loop and watch as your marbles speed off at high velocity!
- Fire up your imagination and create even more exciting circuits!
- A new expansion kit compatible with the entire Action-Reaction range!
- Add fun special effects to your circuits and further sharpen your ability to hit the bullseye!
- Create even more spectacular circuits and jump into the world of physics in a simple and entertaining way!
- 9.1" x 7.1" x 2.8"

61548
Electronic Lab

7+

~NEW~

- The journey into the world of electricity gets under way with a laboratory for building functioning electronic circuits! With the patented modules, making electrical circuits turns into great fun!
- A game that introduces children to a notoriously difficult subject, by letting them experiment with something new and challenging using their own hands.
- The precision of the right assembly and the capacity of a functioning circuit, for learning all the secrets of electronics autonomously while having fun.
- An engaging game that stimulates the child's intelligence as he builds the components and creates electrical circuits that all work differently.
- Besides pre-mounted elements, the set has 18 modules to be assembled and an innovative closure, all based on Italian-made components. A patented assembly mechanism that's guaranteed to be original.
- The electronics makes the lights turn on and activates the sensors, by connecting the modules and wires in a totally safe way on the special workbench.
- Featuring over 20 electrical circuits with varying levels of difficulty, 10 double-face cards and detailed materials for finding lots of sources of inspiration.
- 17.8" x 12.2" x 2.8"

8 005125 615483

~NEW~

61546
110 Experiments Set

- Ready for experimenting with and discovering all the secrets of science? Thanks to this incredible kit with over 100 experiments, the fun never ends!
- Contains all the essentials for completing the experiments and getting acquainted with chemistry, physics, botany and optics in an easy, fun and engaging way.
- An experiment for every occasion: step in the boots of a great scientist and have fun with a truly unique kit!
- Experiment outdoors or at home and delight in observing phenomena and the reactions triggered by your experiments!
- The illustrated manual accompanies the child through the various phases of the experiments, for playing in total safety.
- 17.8" x 12.2" x 2.8"

7+

8 005125 615469

61341
Pet Lab

8+

~NEW~

- A set for children and their families designed to strengthen the bond with their domestic animals. A modular, simple and intuitive kit that can be combined and used in many different ways!
- The games, paths and various activities proposed provide plenty of scientific information on dogs and cats, their characteristics and how to establish or strengthen a special bond.
- A game focusing on how to improve the relationship with animals and educate them properly, with special emphasis on satisfying their needs.
- Entirely made of recycled plastic, it was developed with experts on dog and cat education and is approved by the World Society for the Protection of Animals.
- Features a manual containing pictures and detailed descriptions, plus a special diary to be customized by writing down shared experiences, curious facts and the progress made.
- A kit containing amusing shapes and delicious recipes for preparing reward biscuits for your pet animal.

8 005125 613410

61528
Greenhouse

7+

~NEW~

- A brand-new greenhouse with a modern design to discover the secrets of organic cultivation!
- Made entirely of recycled plastic, with biodegradable jars and organic seeds and a new simple and effective opening system to ensure the right habitat for seedlings.
- With a complete kit of tools and special hanging pots for germination that will help the child plant and grow plants!
- The scientific handbook helps the child discover the secrets of organic agriculture... to become a botanical super expert!
- Play for Future products are created to inform children about the value of sustainability and the importance of respecting the environment through play.
- 16.5" x 12.2" x 3.5"

8 005125 615285

61526
Nature - Gardening Set

Children experiment with organic farming and helps them to cultivate a passion and respect for the environment. It contains a special wooden crate, the tools of the trade, biodegradable pots and certified seeds so they can grow lots of delicious vegetables. Thanks to the tips provided in the manual, learning the secrets of plant life and developing your green thumb will become even more fun.

• 10.9" x 13.4" x 3.3"

8 005125 615261

8+

61724
My First Microscope

A real microscope that's portable and easy to use, perfect to observe objects around you. It introduces the observation of details and helps with scientific experiments. Magnifies objects to 300X.

• 13.8" x 10.2" x 2.8"

8 005125 617241

8+

61549
Super Chemistry

- A set that introduces children to a notoriously complicated subject while they delight in experimenting with a brand new laboratory featuring an attractive design!
- All the instruments of a real scientist for arousing a keen interest in this incredible scientific subject.
- A unique and functional design for many different experiments! An area reserved for solutions and filtrations, one for measuring and weighing substances and a workbench for making chemical reactions.
- An attractive manual with experiments arranged into levels of increasing difficulty, starting from the easiest ones to those requiring several steps to complete for amazing results.
- The play experience extends beyond the product to explore a new field of application in the digital sector, for an increasingly challenging approach.
- Five experiments for a big challenge: only by framing the cards and following the online tutorial can the child find out whether the experiment was successful and share the outcome with friends!

• 20.9" x 14.2" x 3.5"

8 005125 615490

61755
Physics and Engineering Laboratory

A real laboratory for great scientists! So many experiments to try out while exploring the world of exact science!

- Have fun experimenting with chemical reactions in complete safety!
- Prove the laws of physics and discover how lever and gear mechanisms work by building real working machines!
- The extensive illustrated manual guides your child through all the steps of this game.

• 17.8" x 12.2" x 2.8"

8 005125 617555

61728
Amazing Chemistry

- A kit for astonishing chemistry experiments! A laboratory for aspiring scientists to create over 180 experiments and discover the secrets of chemistry in total safety.
- The kit contains plenty of substances to experiment with astonishing chemical reactions and recreate incredible effects!
- All the experiments are described by means of images accompanied by clear and detailed explanations, and are gathered in an instruction manual that turns chemistry into a super-enjoyable game.
- Made in Italy.

• 20.9" x 14.2" x 3.5"

8 005125 617289

61729
Giant Crystals

- A comprehensive laboratory with lots of chemical substances for creating incredible giant colored crystals with many different and fascinating shapes!
- The kit also contains colorants and moulds to grow crystals in moon and starfish shapes.
- A unique kit to explore the chemical reactions of salts and create plenty of scintillating maxi crystals.
- The manual guides the child with images and detailed explanations through every step of the various experiment phases, for playing and having fun in total safety.
- Box dimension: 17.8" x 12.2" x 2.8"

8 005125 617296

61173
Create your own Crystals

- A fun lab to create lots of different animal-shaped crystals.
- Manual provided to discover the chemical reactions of the salts.
- 13.8" x 2.8" x 10.2"

8 005125 611737

61522
Vampires and Blood

A scientific laboratory that is a scream for children to create vampirish fun and blood-curdling slimes.

- 13.8" x 10.2" x 2.8"

8 005125 615223

61347
Volcanoes and Super Eruptions

8+

~NEW~

- A fantastic volcano to be customized for making spectacular glow-in-the-dark eruptions!
- The game contains: plaster and a mold for making the volcano, tempera paints for coloring it, bicarbonate, a UV torch and neon pigment for creating amazing eruptions!
- One of the best-known scientific experiments is now even more fun thanks to the neon-effect of the volcano's "lava"!
- The scientific manual helps the child to complete the various experiments in total safety.
- A game designed for introducing children to science in an easy and fun way.
- 13.8" x 10.2" x 2.8"

61520
Crazy Anatomy

Assemble the human skull with all its parts and have fun discovering to the assembly phase: a game combining the pleasure of building a part of the human body with the thrill of touching and understanding how our skulls are made.

• 13.8" x 10.2" x 2.8"

8+

61763
Time Piece Laboratory

With this amazing pendulum clock, you'll discover one of the most ancient and studied subjects in history: time!

- Clock ready to be assembled
- A kit for discovering the secrets and working mechanisms of a clock!
- A rich illustrated manual for learning how the power transmitted by a spring moves the hands of a clock!
- 13.8" x 10.2" x 2.8"

8+

61544 Tattoo Art

- A laboratory that's also an incredible set containing all the essentials for making trendy tattoos!
- Contains a workbench, marker pens, liquid colorants and stencils for making freehand tattoos like a real tattoo artist!
- The manual explains how to make tattoos step-by-step, guiding the child through a fun and engaging play experience.
- All substances and materials included in the kit have been tested to ensure they are entirely safe on the skin.
- A game that stimulates creativity and manual skills.
- 15.2" x 11.1" x 3.0"

8+

~NEW~

~NEW~

61344 Soaps of the Sea

- Get your hands on the scent of the sea with this amazing kit for making perfumed and colored soap bars!
- Everything you need to make perfumed soap bars with plastic sea-themed elements inside them.
- Children can approach cosmetic science in total safety also thanks to the manual which will guide them step-by-step through the experiments.
- A fun game for making objects with a guaranteed sensational effect!
- 8.3" x 9.9" x 2.6"

8+

61519 Glitter Magic

~NEW~

- This scientific kit allows discovery of the glowing and sparkling side of science, personalizing and decorating creations with glitters.
- The pack also includes a lava lamp to assemble and decorate children's rooms in line with current trends.
- The instructions come in the form of a little book with images and illustrations that explain how to create splendid glittering slimes or decorate objects using original glitter effects.
- In addition to the creative element, little girls can discover and experiment with simple chemical reactions that allow them to learn the science in a fun and practical way.
- The components and substances used for the experiments are tested and certified to guarantee fun and safe play.
- 13.8" x 10.2" x 2.8"

8+

61357
Science Apprentices

- A multi-experiential kit that will accompany smaller kids as they approach the world of science.
- Lots of experiments for playing with colors, weights and sizes, creating plenty of solutions, discovering the properties of water and lots more.
- A laboratory with specially designed components that will encourage children to be independent during the various play experiences.
- Amusing video tutorials with nutty scientists guide and integrate the child's experimentation process.
- 13.8" x 10.2" x 2.8"

5+

~NEW~

61551
Vet Apprentices

- For all children who dream of becoming veterinarians, this fantastic kit will help them discover this remarkable profession!
- The kit also contains a tender plush toy to take care of and all the essentials for optimally doing so: a stethoscope, bandages, gauzes, and a special collar.
- In addition, for guaranteed fun there's a video tutorial with an amusing vet who will guide the children through all the proposed activities!
- 16.5" x 10.9" x 3.7"

~NEW~

5+

61358
Explorer Apprentices

- The perfect game for budding little explorers! For endless fun and games out in nature!
- A case containing all the essential accessories for introducing children to nature watching.
- It contains: a pair of birdwatching binoculars, a special bug viewer and plaster casts for taking animal footprints, as well as cards packed with information about nature.
- A straightforward yet engaging game for outdoor fun as children step in the boots of real explorers!
- 13.8" x 10.2" x 2.8"

~NEW~

5+

61376
T-Rex Giant Skull

- A scientific activity that teaches children about the most fearsome dinosaurs of the Jurassic period!
- The set includes a plaster-of-Paris brick that kids can chip at with a hammer and chisel to retrieve all the parts of a T-rex skull.
- Children will have fun putting the skull back together again just like a real paleontologist!
- 8.3" x 9.9" x 2.6"

61245
Archeofun - T-Rex & Triceratops

- Dig, discover and assemble two realistic dinosaur skeletons.
- Includes a hammer and chisel
- 13.8" x 2.8" x 13.2"

Glow in the Dark

Now with
Augmented Reality App!

61343
NASA Asteroids from Outer Space - Rover

- An amazing NASA science kit for unearthing real meteor fragments and special space vehicles!
- The game contains a plaster-of-Paris brick, hammer and chisel for chipping away and unearthing a Mars rover, a drone, an astronaut and a meteorite fragment!
- Assemble the rover and the drone then take off like a real astronaut for an incredible mission!
- A manual packed with interesting facts on the missions that led man to explore outer space!
- 8.3" x 9.9" x 2.6"

61350
NASA Asteroids from Outer Space - Shuttle

- An amazing NASA science kit for unearthing real meteor fragments and special space vehicles!
- The game contains a plaster-of-Paris brick, hammer, and chisel for chipping away and unearthing a Shuttle, a lander, an astronaut and a meteorite fragment!
- Assemble the Shuttle, the lander and the parts then take off like a real astronaut for an incredible mission!
- A manual packed with interesting facts on the missions that led man to explore outer space!
- 8.3" x 9.9" x 2.6"

75069

Mechanics - NASA Floating Shuttle

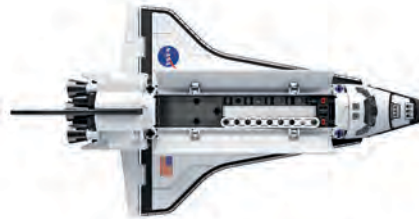

~NEW~

- Outer space has never been so astonishing! A Shuttle that will fly you towards incredible adventures like a real astronaut!
- The Shuttle awaits to be built and will seem to float in the air thanks to the tensegrity effect!
- By following the assembly instructions given in the manual or in the app, children can experiment what lies behind an optical illusion: tensegrity, a fascinating principle of physics.
- The Shuttle leaves its base for a totally free play experience. The adjustable ailerons rise and fall, the cargo hold opens to reveal the Canadarm, the robotic arm used by astronauts in outer space!
- An amazing play experience for introducing children to the world of mechanics and engineering.
- 15.6" x 10.9" x 2.4"

8+

75070

Mechanics - NASA Mars Rover

~NEW~

- A futuristic NASA transport rover for a thrilling exploration of Mars. A motor-driven model with counter-steering front and rear wheels, equipped with an exploration mini-rover.
- Each time there's a different challenge to encourage children to think and imagine possible solutions and assembly options while having fun.
- A large construction laboratory for stimulating creativity and imagination. A play experience that requires concentration and accuracy from start to finish.
- By assembling the various components, the child can test his ideas and concretely verify whether the resulting solutions are correct or can be improved.
- In addition to the illustrated manual, there's an app with 20 different models for the child to explore plus interactive 3D instructions explaining the various assembly phases in a simple and fun way.
- The wide variety of components, precise interlocking and the adaptability of the pieces allow the child to build more than one model using the same pieces.
- 17.8" x 12.2" x 2.8"

8+

75068
Mechanics - Firetruck

- A large motor-driven fire truck plus 4 other models to build for experimenting with and learning the most important concepts of mechanics and engineering, for fun-filled moments!
- Each time there's different challenge to encourage children to think and imaging possible solutions and assembly options while having fun.
- A large construction for stimulating creativity, imagination and manual skills.
- Contains all the essentials for allowing the child to freely test his ideas and tangibly verify the solutions.
- The fireman's ladder lifts and lowers manually, while the motor rotates the ladder by 360° and moves the drive wheels. Race towards incredible rescue missions!
- The illustrated manual and app will help to discover new models and explain the assembly stages in an easy and fun way.
- Thanks to a wide variety of components, Italian-made craftsmanship, precise interlocking and the adaptability of the pieces, different reproductions can be built each time.
- A comprehensive play experience: assemble the parts and reconstruct the mechanisms, then set the vehicle in motion and embark on plenty of adventures.
- 17.8" x 12.2" x 2.8"

8 005125 750689

8+

61874
Mechanics - Radio Control Police Car

- An amazing scientific kit to discover the principles of mechanics and engineering and to run at full speed with two police car models.
- It contains more than 300 components to be assembled; two electric motors for rear wheel drive and front steering wheel, gears and a transmission unit.
- Connecting the cars to the radio frequency receiver children can drive the cars via remote control and start exciting car chases.
- The illustrated manuals and the free special app will guide children step by step in the building of the models.
- 17.7" x 12.2" x 2.7"

8 005125 618743

8+

75025
Mechanics Laboratory

- A laboratory to learn the principles of mechanics and engineering
- The package includes 250 components to achieve more than 50 models of different levels of complexity
- 17.8" x 12.2" x 2.8"

8+

8 005125 750252

61732
Mechanics - Luna Park

8+

- A scientific kit to recreate a real amusement park, challenge the laws of physics and discover mechanics in an easy and fun way!
- With over 200 components you can create 20 models including the motor-driven observation wheel, the carousel and other crazy attractions! A further 30 applications to be discovered online.
- With the incredible Mechanics Laboratory app and its 3D interactive instructions, assembling the models becomes even simpler.
- The detailed illustrated manual will guide you in building the models in an engaging and fun way.
- 17.8" x 12.5" x 2.8"

8 005125 617326

75064
Mechanics - Crawling Farming Tractor

A sensational new kit to build a crawler tractor driven by an electric motor and "cultivate" a passion for mechanics. Over 200 components to build 20 models and technical applications. The tractor also has agricultural equipment driven by the motor via a mechanical transmission system.

• 17.8" x 12.2" x 2.8"

8 005125 750641

8+

75063
Mechanics - Mountain Rescue

Let your passion for building take to the air for incredible adventures on the Technology Science & Play rescue helicopter. A new incredible kit with over 250 components to build a motorized helicopter and 20 other models and technical applications. Lots of components including a worm screw, universal joint, planet gear carrier, gear wheels, blades and rotors, to approach the world of mechanics in a simple and fun way.

• 17.8" x 12.2" x 2.8"

8 005125 750634

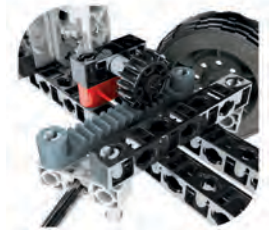

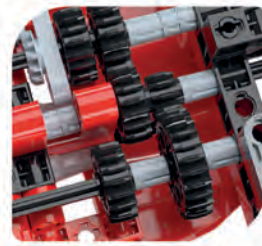

8+

80132
Mechanics - Racing Car

- Speed off into the world of Formula 1 with this incredible laboratory!
- 20 racing car models to be built from more than 350 interchangeable components.
- Build a Formula 1 car with functioning steering wheel, adjustable rear spoiler and rear wheels that can be operated via a differential gear, and also a go kart, a super buggy and many other models.
- The manual helps your child through the component assembly steps and guides them as they discover the secrets of mechanics and engineering.
- 20" x 12.4" x 3"

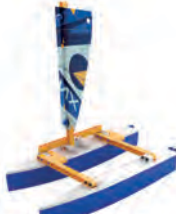

61524
Mechanics - Floating Trimaran

A sailing boat model to be recreated and discovered in its every detail thanks to sturdy components, for inventing new projects and getting familiar with mechanics and marine engineering.

- 15.6" x 10.9" x 2.4"

75065
Mechanics - Floating Dragon

A chained dragon who wants to spread its wings and fly away and an optical illusion waiting to be constructed. The effect of tension will cause the dragon to look as if it is floating in air. A fantastic dragon model kit to be built while discovering a principle of construction that is all over the web; "tensegrity". When children attach the chains that hold the dragon in place, they will see the action of tension and how it creates structural integrity, making it seem that the dragon is hanging in mid-air.

- 16.5" x 10.9" x 2.4"

75028
Mechanics - Planes and Helicopter

- Discover and experience the mechanics of flight mechanics with the Mechanics Laboratory – Airplane and Helicopter.
- A fantastic kit with which to build 20 dynamic models of planes and helicopters and to learn about the basics of aerodynamics.
- More than 200 components, including: bars to assemble the structures, panels, propellers, gears, pulleys and universal joints.
- Two manuals showing all the instructions to assemble the models and great insight about the history of flight.
- 14.6" x 11.1" x 2.0"

8+

75082
Mechanics - Farm Vehicles

- A "Made in Italy" scientific kit for having fun discovering the science behind the operation of agricultural machines.
- The illustrated manual explains how to assemble the models and includes some insight on the principles of mechanics and engineering.
- 15.6" x 10.9" x 2.4"

8+

~NEW~

17374
Mechanics - Bulldozer

- A set for building a bulldozer and 9 other types of construction vehicles!
- With over 200 components such as flat and conical cogged wheels, racks, differential gears, worm screws, spiked tires, bars and panels.
- The bulldozer's bucket lifts up thanks to a worm gear mechanism and the vehicle changes direction when you turn the steering wheel.
- 15.6" x 10.9" x 2.4"

8+

75038
Mechanics - Monster Trucks

- This incredible technology laboratory helps you get closer to the world of mechanics and engineering as you build a powerful Monster Truck!
- This kit contains more than 200 components to be assembled, including: differential, rack-and-pinion steering and Cardan joint. You can discover and build 10 fantastic and dynamic models!
- Thanks to the illustrated manual, your child will be guided step-by-step through the building of 10 different models as they discover the fundamentals of mechanics and engineering.
- 15.6" x 10.9" x 2.3"

Mechanics - Firefighting Helicopter

- The firemen are ready to go on a rescue mission on a helicopter or hovercraft waiting to be built!
- Children can use over 160 components to build an incredible rescue helicopter and a hovercraft, with mechanisms that work for real.
- The helicopter wheels are connected to the rotors, so when the helicopter moves the propellers rotate, making the model even more realistic!
- The hovercraft propellers move for real, thanks to the transmission components to be assembled.
- The app with 3D instructions will guide the child step-by-step in building the models.
- 10.9" x 7.4" x 1.8"

61346
Mechanics - Haul Truck

- A model haul truck waiting to be assembled so children can discover the secrets of mechanics and engineering!
- With over 150 components, children will be able to build 2 model trucks with a tipper bed for loading and unloading precious materials, rocks and much more!
- With manually steerable wheels, the truck moves realistically so children can act out enthralling adventures inside underground mines!
- The free app contains 3D instructions explaining step-by-step how to easily assemble both models in every phase.
- An original toy for true fans of mechanics and engines!
- 10.9" x 7.4" x 2.4"

75032
Mechanics - Copter & Fanboat

- A scientific kit to discover the secrets of aerodynamics and fluid dynamics.
- Featuring two dynamic models of a three-rotor helicopter and airboat to build, children can discover the way transmission mechanisms work.
- Contains more than 130 interchangeable components.
- In addition to assembly instructions, a sheet with lots of interesting facts about the physics of flight and nautical engineering.
- 10.9" x 7.4" x 1.8"

75056
Mechanics - Buggy & Quad Pullback

Fun moves up a gear and goes even faster with the Pull-Back Buggy and Quad. With over 100 components to build two fantastic models and embark on new adrenaline-fueled adventures.

• 1.8" x 7.4" x 10.9"

75057
Mechanics - Racing Cars

8+

~NEW~

A racing car to be recreated and explored thanks to sturdy components, for speeding off to new adventures, turning ideas into reality and getting familiar with mechanics and engineering.

• 2.4" x 10.9" x 7.4"

Mechanics Junior - Moving Robots

6+

~NEW~

- The new mechanics laboratory for small children, with plenty of components that are easy to assemble, paves the way for the super-kit with robots that move and walk thanks to a motor-driven module.
- Each of the 5 models moves in a unique and highly amusing way! A different challenge each time that will delight children as they explore and imagine possible solutions and how to assemble the parts.
- A large construction laboratory for stimulating creativity and imagination. All the essentials for letting the child freely test his ideas and concretely verify the solutions.
- There's the robot that skis, one that collects, another one that drags, one that walks and one that is a completely crazy one. Each robot moves in an entirely unique way.
- Thanks to a wide variety of components, Italian-made craftsmanship, precise interlocking and the adaptability of the pieces, different reproductions can be built each time.
- Features resistant interlocks and easy-to-handle components for a result that reflects the tastes of small children, who like to be taken by surprise right away.
- 3.0" x 11.8" x 11.8"

75060

Mechanics Junior - Moving Animals

6+

- Invent, assemble, play! This is Mechanics Junior kit, the new mechanics laboratory for small children, with plenty of components that can be easily assembled to create fantastic animals that move and walk.
- The toy contains 120 elements: beams, plates, nails, cubes, pulleys and special pieces (ellipses, arcs and triangles). The motor-driven module will enable you to animate each assembled model.
- The instructions will guide you in assembling 5 models of amusing animals: the gorilla, the lion, the seal, the shark and the insect. The rest is up to your imagination!
- To initiate the movement, simply start the motor and... the gorilla walks on its own legs, the insect beats its wings, the shark chases you, the seal moves clumsily forward and the lion runs.
- Never-ending fun with Mechanics Junior kits; assemble, play, take apart and start rebuilding the next fun animal.
- 3.0" x 11.8" x 11.8"

75061
Mechanics Junior - Moving Dinosaur

A fascinating kit that takes you back into prehistory to build 5 motorized dinosaur models including an incredible T-Rex plus a Brontosaurus, Stegosaurus, Triceratops and Pterodactyl.

120 components to build the 5 different models.

The clear instructions will guide you in assembling the models

Start the motor and the dinosaur walks on its own.

• 3.0" x 11.8" x 11.8"

75058
Mechanics Junior - Insects

• A fantastic construction kit for small children that can be used to simultaneously create 3 models of insects: the spider, the snail and the locust.

• More than 130 components for creating models animated by drag or click mechanisms, thanks to elastics, and for playing with insects that actually move!

• A toy that helps children to develop manual skills, logical abilities and creativity.

• 2.4" x 7.9" x 7.9"

61547
Mecha Scorpion

The Mecha Scorpion Robot mimics the movement and appearance of a real scorpion. With 6 legs driven by two motors, pincers and tail that can move, and an infrared sensor on its head that allows it to react to stimuli and engage in various play modes such as guarding, attacking, and gripping objects. The robot can also be controlled remotely using a dedicated app, making it a fun and educational tool for children to learn about programming and the basics of robotics while developing their manual skills and logic.

Requires 4x AAA batteries (not included)
115 pieces to assemble
2 play modes, Analogue or App
Device required to run app
10.9" x 16.5" x 2.4" 2.6 lbs.

8 005125 615476

61529
Mecha Dragon

A kit to make a fantastic Mechanical Dragon that uses its 3 motors and multiple sensors to interact with the child and the surrounding environment for endless adventures.

The Dragon can be controlled using an app that communicates with high frequency signals or through the 4 infrared sensors. Using its 2 motors and the servo motor, it moves its wings and mouth, the drive wheel and the joint in the middle of the body, which allows it to turn and chase its prey as if it were alive.

2.8" x 12.2" x 17.8"

8 005125 615292

61354
SlimeBot

8+

- An amazing robot to be assembled with a disgusting gloopy brain!
- Put water and one of the 3 colored powders inside the head, then watch it mix the substances together and create your slime!
- The Slime Bot features a motor with an axle connected to a spinning blade which will also cause a sieve to rotate, mixing the slime together!
- But there is yet more to come! The Slime Bot motor has been fitted with an eccentric which makes it vibrate from head to toe!
- As the Slime Bot walks, its rubbery tentacles move too, making the game even more fun!
- 11.0" x 9.6" x 3.3"

~NEW~

Cyber Robot

8+

- Bluetooth module and 4 play modes program the robot's movements, lighting effects and sound effects using the FREE app for tablets and smartphones
- Display a simulation of the programmed command as it is being executed to control the robot in real time using your device.
- Robots route can be set manually through an electronic card with buttons.
- The included manual provides a wealth of information on robotics and electronics.
- Batteries required: 4 x AA (not included)
- 17.8" x 2.8" x 12.2"

8 005125 750221

75053
Mio the Robot

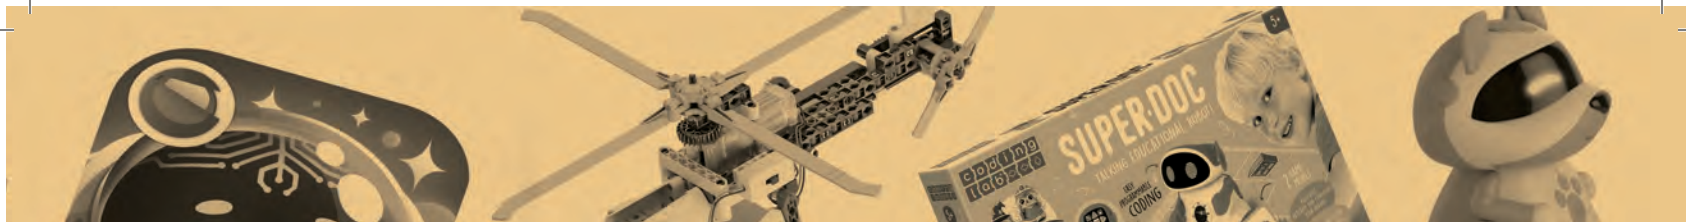

8+

- A new and improved version of our best-selling robot kit with new features.
- A unique scientific kit which allows you to assemble a real robot!
- Have fun programming its movements and invent exciting challenges with your friends.
- New to this are two motors, 2 IR sensors and a microphone for more fun.
- The kit includes a rich variety of interchangeable components allowing you to transform the robot the way you want it.
- The illustrated scientific manual provides a wealth of information about robotics and electronics so you can become a real robotics expert.
- 7.0" x 4.8" x 1.1"

8 005125 750535

75066
Robo Beetle

8+

~NEW~

- A kit for building a cute beetle robot!
- If you put this robot on the table, it moves around busily, yet realizes when it has reached the edge, stopping and changing direction to avoid the fall!
- The upper part of Robo Beetle's body is transparent, leaving the internal cogs completely visible and allowing children to observe the mechanisms that cause the robot to move around.
- 10.9" x 7.4" x 2.4"

75054
Slither Bot

17372
Jumping Bot

A snake to be assembled that comes to life and starts crawling sinuously around the room as if it were real. It faithfully replicates the "slithering" movement of the snake, arousing the child's amazement. An exclusive and engaging experience that allows the child to interact with the assembled construction, making the games' progress fun for children and adults alike. A 15.75" long snake for making the interaction even more fun.

• 2.4" x 10.9" x 7.4"

- A fantastic robot shaped like a jumping frog to have fun and leap into the world of robotics!
- A robot to be assembled, with a motor that, if activated, makes the robot actually leap!
- The eye of the jumping bot is a gear that, when rotated, makes a fun spiral-shaped optical effect.
- 10.9" x 7.4" x 2.4"

8+

8+

75055
Rolling Bot

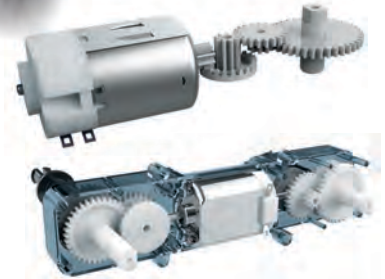

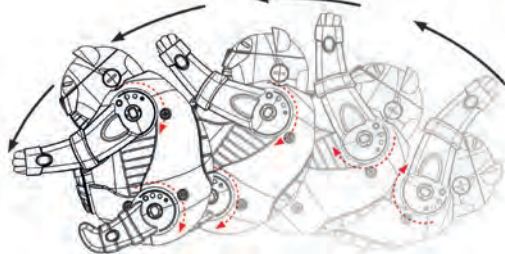

8+

Simply adorable with its funny looks, the panda robot moves by doing somersaults like in real life. An animal robot that can be assembled for an unrivaled play experience. Standing nearly 10" tall, the robot reproduces the panda's movement with the amusing clumsiness of this animal. The motor allows the panda to do repeated somersaults in a succession of automatic movements. The rotary movement enables it to bounce on walls and change direction.

• 2.4" x 10.9" x 7.4"

Rolling Bot can do repeated somersaults in a succession of automatic movements

75040
Ecobot

8+

- A super little robot which is simple and fun to assemble from scratch.
- Equipped with a dual-axis electric motor to which an extender shaft and fan are attached, this little robot can dislodge and suck up small debris such as dust and crumbs.
- Thanks to the illustrated manual and extensive scientific information, this kit provides that first step into the world of robotics.

• 10.9" x 7.4" x 2.3"

75039
Walking Bot

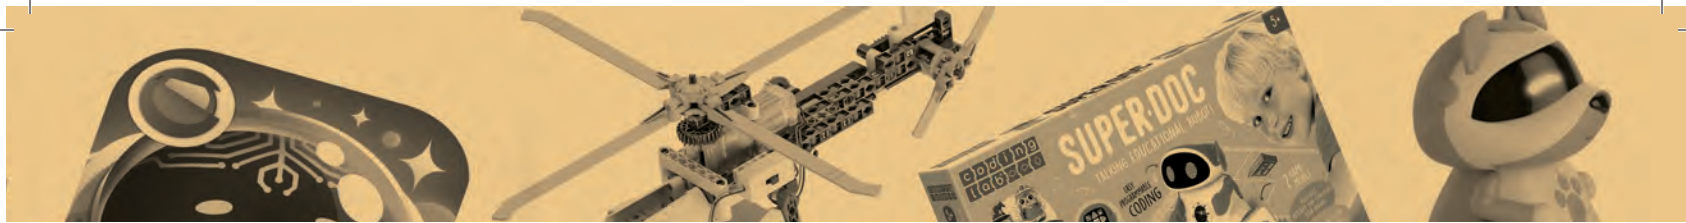

This robot will never fall from the table thanks to the mechanical system that changes the direction when it is unbalanced.

- A science kit to build a lovable little robot in a simple and fun way!
- Contains 40 pieces all to be assembled to bring a little robot to life. A twin-axle motor operates through various gears, enabling the robot to walk.
- With its moving joints, the little robot actually moves and walks like a real bionic four-legged friend!
- The illustrated manual is full of scientific information to guide the child in assembling the robot and give introduction to the world of robotics.

• 10.9" x 7.4" x 2.3"

8+

75073
Dino Bot - T-Rex

- The new Dino Bot T-Rex is designed to develop manual dexterity and logical thinking in younger children and familiarize them with STEM principles.
- Includes special tools that makes assembling your Dino Bot T-Rex easy.
- Each Dino Bot has special mechanisms which result in unique movements.
- 7.9" x 7.9" x 2.4"

5+

~NEW~

75074
Dino Bot - Triceratops

- The new Dino Bot Triceratops is designed to develop manual dexterity and logical thinking in preschoolers and introduce them to STEM principles.
- This model is a fun and colorful reproduction of one of the best known dinosaurs - the Triceratops.
- Various special tools are supplied with the kit, making assembly of the Triceratops easy.
- 7.9" x 7.9" x 2.4"

~NEW~

pet_bits

The device hears the sounds and reacts to clapping — moving and dancing according to the number of times you clap your hands. A young child can also have fun by talking to his/her own Pet_Bit! The robot records the voice and reproduces it with a robotic effect.

Each Pet_Bit has its own personality and interacts with the others, using a special call and dance and talk to each other with cute sounds.

The free app teaches young children the basics of coding in a fun and age-appropriate way. The app also lets children interact with the robotic pets, looking after it, giving it food and things that you will win during the game.

Mind Designer - Intelligent Educational Robot

- This innovative intelligent robot guides your children through the process of learning mathematics, arithmetic and geometry.
- It introduces your child to design using the precision motors which enable them to create geometric shapes and designs of varying complexity with extreme precision.
- This incredible robot can be programmed manually or by voice using the innovative voice recognition function.
- With the Arithmetic chart, Mind can be programmed to carry out arithmetical functions, while using the Escape Room chart, your child will be encouraged to solve quests and develop skills in logical thinking.
- Using the exclusive free App, your child can experiment with coding instruction blocks, create complex geometrical shapes and play with loads of original interactive code-games.
- Thanks to Bluetooth technology, Mind's content is permanently updatable for limitless playability! Marker, charts and sheets are included in the package.
- 17.6" x 12.0" x 4.4"

75052 Bubble Intelligent Robot

6+

Box contains:

- 1x Bubble robot
- 33x cards
- 3x felt tip pens
- 1x red magnifying glass
- Bubble is a fun robot who can draw different shapes and play games.
- You can play with Bubble in 2 modes. The first mode is the drawing mode. The robot has a soft button panel on its back and you can press on the colorful buttons to give it commands to make it move in different directions.
- By inserting the pen into its holder, the robot will be able to transform the sequence of instructions into movement creating a drawing. This allows for endless drawings from your imagination just by programming Bubble.
- Each button has its own musical note, so each drawing will be connected with a unique tune. For this activity we prepared some cards for a game; you can pick a card which will have a mysterious pattern on one side and a code on the other. You will need to give the code to the robot and make it draw; now use the magnifying glass to check the pattern on the other side of the card: if you pressed all the commands correctly, the picture will match the picture hidden in the pattern, and you won the card.
- The free app can be downloaded from most app stores. With it, you can create new drawings to run as programs, sending the coding from a device to the robot, and letting the robot draw your design. Or the app can be used to create a game to play.
- In the second mode the robot will act on its own by simply turning around and saying gibberish every now and then. In this mode you can also interact with it by clapping your hands twice (it will move forward) or by blowing on its' head (it will be pushed away by the air flow).
- 16.5" x 11" x 3.8"

75037 Coko Programmable Crocodile Robot

3+

Coko is a nice, friendly crocodile robot for your child. With him, your child will take the first steps into the world of coding in a simple and fun way. Simply place the command cards on his back and press OK.

Unlimited paths can be created using furniture and other objects to move Coko around. The only limitations are your imagination. The set comes with Coko, 15 command cards and a magnetic target.

Simple and intuitive gameplay

Big and colorful

A world of possible paths. Learning by doing. Stimulates creativity. Magnetic sensor for feeding play.

Soft Clemmy

Clementoni®

Made in Italy
months 6-18

17807 Soft Clemmy Sensory Basic Bucket

- A new Clemmy bucket with a soft cover, enriched with textures and slots for playing with the 15 blocks included.
- The soft, tactile colored blocks help the child to develop manual skills and visual perception.
- The new cover is part of the toy, where you can stack the blocks on top of the slots or insert them into the bucket through the flower-shaped opening.
- 7.5" x 7.9" x 7.5"

~NEW~

17315 Soft Clemmy - Baby Car Basket

- A fun car with different textures and openings to stimulate sensory development.
- Open / Close lid to get the blocks out
- 8 Soft Clemmy Blocks to use in and out of the car and to use with other Soft Clemmy sets
- 11.0" x 7.7" x 7.1"

14889 Soft Clemmy Set of 24 Soft Blocks

- 24 Soft blocks
- 10.6" x 8.1" x 17.3"

17134 Soft Clemmy Set of 48 Soft Blocks

- 48 Soft blocks
- 12.2" x 9.8" x 5.6"

17689
Soft Clemmy- Touch & Play Sensory Ball

- The softness and sensory quality of Clemmy packed into a user-friendly, simple and fun product.
- Contains 4 slices of different colors and textures for stimulating sight and touch in small children.
- The set also includes 5 Clemmy blocks to be inserted in and removed from the ball through the perforated slice.
- 6.7" x 7.87" x 6.7"

17806
Soft Clemmy - Sensory Rocket Bucket

- The new Clemmy Space Rocket comes with a cute "astronaut" figure. Full of activities with blocks for creating, stacking and imagining lots of space adventures.
- Insert the blocks through the tactile, soft plastic hole and recover them by opening the cover.
- The astronaut can be stacked onto the blocks and inserted into the rocket, ready to depart and explore the soft Clemmy universe!
- 8.3" x 10.8" x 5.9"

17424
Soft Clemmy - Sensory Train

A soft train with locomotive and carriages that children can play with and explore with their hands. The children can discover textured surfaces and different shapes, while enjoying a sensory experience that will allow them to hone their sense of touch and manual skills. Contains lots of soft colored blocks to be placed onto the locomotive and carriages, or one on top of the other, to create soft-colored towers to topple and then rebuild again and again.

- 15.4" x 7.5" x 11.0"

14754
Soft Clemmy House Basket

- A house-shaped box with a door and roof that open up
- 15 soft building blocks
- Perfect for sensory exploration
- 10.4" x 7.3" x 8.3"

17352
Soft Clemmy - Touch, Crawl & Play Sensory Pack

- A tactile journey to be constructed by assembling the maxi pieces made of soft, safe and non-toxic rubber, designed to create an engaging experience for infants.
- The surface of the pieces have different relief textures to stimulate the child's tactile perception.
- Thanks to the Clemmy shapes present on the pieces, the child can delight in fitting the bricks together to create lots of towers.
- Stimulates tactile perception, observational skills and manual skills.
- 15" x 11.2" x 3"

~NEW~

17662
Soft Clemmy Sensory Farm

- A Farm play set abounding in textures with raised surfaces, soft signature-Clemmy inserts, lots of blocks and friendly farm animals.
- The sensorial farm contains lots of cuddly Clemmy blocks that can be stacked, squashed and easily slotted in through the windows and from the roof.
- A part of the roof can be opened for play and to get the blocks back.
- These activities help children to make logical links as well as developing manual dexterity and handeye coordination.
- Multiple surfaces with raised parts and different textures encourage kids to explore and develop their sense of touch.
- The attractive setting and cute characters make for spontaneous creative play and children will be able to invent a host of farm-related stories about the farm.
- 13.0" x 9.4" x 5.9"

~NEW~

17704
Soft Clemmy - Touch, Discover & Play Sensory Table

- The little house makes a handy container for soft blocks and the slot on the roof is perfect for dropping them in.
- There's a catapult that makes the Soft Clemmy blocks "jump", while the cogs turn the carousel on which the blocks can be arranged.
- There are slots to let the Clemmy blocks fall into the cavities of the table legs and then retrieve them.
- A booklet with the pop-it activities stimulates manual abilities in the child.
- Surfaces have tactile relief textures and the soft inserts
- 20.9" x 17.3" x 5.1"

PLAY CREATIVE

15276 Monster Drawings

- This entertaining toy gives free range to the imagination. Design fascinating little monsters using frottage, a rubbing technique!
- Contains 6 interchangeable tiles with raised images of the parts of 4 cute little monsters you can put together in varying ways and create the image using the color pencils.
- The kit also includes paper and markers to decorate your characters.
- Stimulates manual dexterity and creativity in your youngest children.
- 14.6" x 11.1" x 2.0"

4+

15272 Make Your Own Aquarium

- The perfect toy for diving into a world of imagination and creativity!
- Assemble this fun aquarium, decorate it and fill it with cute little fish you can make out of various materials.
- This toy also contains a backdrop to color in and lots of levers that make the fish move and "swim" off on fantastic adventures!
- Stimulates manual dexterity and creativity in your youngest children.
- 10.4" x 8.3" x 2.8"

4+

15273 Adventure Castle Playset

- The adventures of princesses, knights and dragons come to life in this toy you can build and decorate with your imagination!
- A magical castle you can build and color, with lots of cute peek-a-boo effects, levers which operate the drawbridge, characters to play with and fantastic stories to create!
- Stimulates manual dexterity and imagination in your youngest children.
- 10.4" x 8.3" x 2.8"

4+

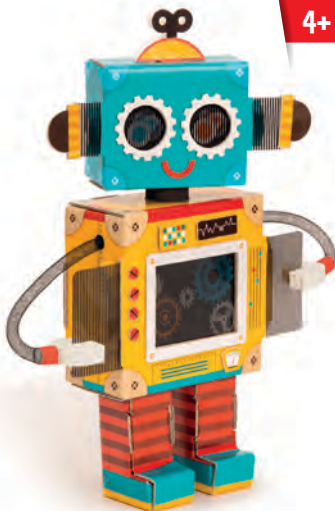

15274 Make Your Own Robot

4+

- The ideal toy which brings great little cardboard robots to life. Build them and color them in!
- A robot to assemble piece by piece and bring to life with incredible shiny stickers for their eyes and bodies which produce optical illusions!
- Stimulates manual dexterity and creativity in your youngest children.
- 10.4" x 8.3" x 2.8"

15271 Spongy Animals

- Explore the animal kingdom in a creative and entertaining way!
- Entertaining animals in soft rubber you can assemble and bring to life in incredible stories and adventures!
- Stimulates manual dexterity and imagination in your youngest children.
- 10.4" x 8.3" x 2.8"
