# CORKISH & CO.

The all new Corkish & Co line represents 3 years work of product development. A first jump for the Purple Cow into the world of collectible figurines.

The concept: taking the regular wine cork (included in the box), and creating a sensational collection of Corkish characters.

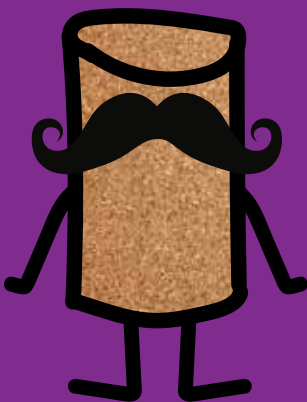

The boxes include the cork + a set of unique finely crafted character pins and accessories. Assemble in a few seconds - and watch how these characters come to life right before your eyes!

**These adorable cork characters come in 3 packages:**

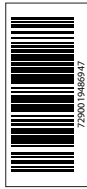

- Single packs
- Blind packaging single packs
- Countdown Calendar with 24 figurines

This amazing collection is bound to make a bold statement in your room, home or office and spread smiles from side to side, adding a touch of personality to wherever you place them.

Suitable for kidults and for teens ages 13 and above to assemble on their own. Suitable for younger kids under adult supervision.

## Truth & Dare

'Truth & Dare' is the Purple Cow attempt to 'tame the beast' of the wild classic game and make it safe and FUN to a broader range of audiences. It's the World's first card game to come in a bottle and a great way to learn more about your friends and family, maybe even more than you ever wished you knew...

**There are 5 titles in this range:**

1. The classic 'Sleepover Party' version with all the embarrassing 'Dares' and intrusive 'Truth' questions.
2. The bonding 'Family' version – want to see daddy doing hilarious 'Dares', want to hear your kid's dreams and fears?

This is just the game for you.

3. The 'Travel' version - what can be more suitable than playing this game near a bonfire outdoors?
4. The 'Birthday' version - for the perfect birthday party.
5. The 'Icebreaker' - the funniest and most engaging way to break the ice at work, with friends and in new social situations.

## Mega Munch Board Games series

A Trio of Clever Food-Themed Board Games – Smart & Fast-Paced Fun.

Sushi Sum, Towering Burgers, and Pizza Party Rummy blend quick thinking, tactical decisions and realistic playful food themes to create fast, competitive, family-friendly fun. Whether you're building the perfect pizza, racing to assemble towering burgers, or crunching numbers to grab Sushi, all three games share the same irresistible recipe: easy-to-learn rules, vibrant realistic game pieces, smart gameplay twists, and highly interactive challenges and of course – laughter.

**NEW!**

**Pizza Party Rummy** is a delicious twist on classic Rummy - players build pizzas instead of card sets! Create either single-topping pizzas or themed "concept pizzas" like *Meat Lover* pizza or *Veggie Delight* pizza using magnetic toppings. Rearrange sets, add toppings, and use Joker magnets to complete your pizza. The first player to place all their toppings onto valid pizza sets and put their empty slice on the tray wins. A fast, fun, and irresistibly tasty strategy game for 2-4 players!

### Sushi Sum

Sushi Sum is a fast, brain-boosting game where clever thinking helps you collect the most Sushi bites. Roll all three dice, create a simple equation using basic math signs, and match your result to a Sushi tile on the board. Use chopsticks to grab your Sushi—but drop it, and it goes back to the board! As the board empties, the challenges grow tougher and the fun ramps up. Easy to learn and endlessly replayable, this smart 2-in-1 game includes Sushi Race and Sushi Bingo.

## Towering Burgers

Who can resist a giant overloaded burger? Race around the board, grab ingredients fast, and be the first to reach the finish with all must-haves: • 2 buns • 1 patty • 1 veggie • 1 sauce. Hidden French Fries cards can help, sabotage, or flip the game into chaos. First to complete the final lap, with the tallest and craziest burger, wins!  
**Easy to learn. Fast to play. Deliciously chaotic.**

## doodle a droodle<sup>®</sup>

Doodles are nonsense amusing cartoons that were originally created in the early 1950s.

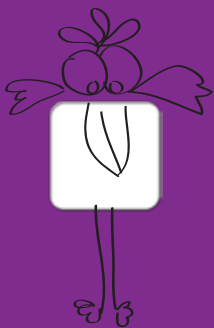

The name "droodle" signifies a mix between a "doodle" (a sketch) and a "riddle".

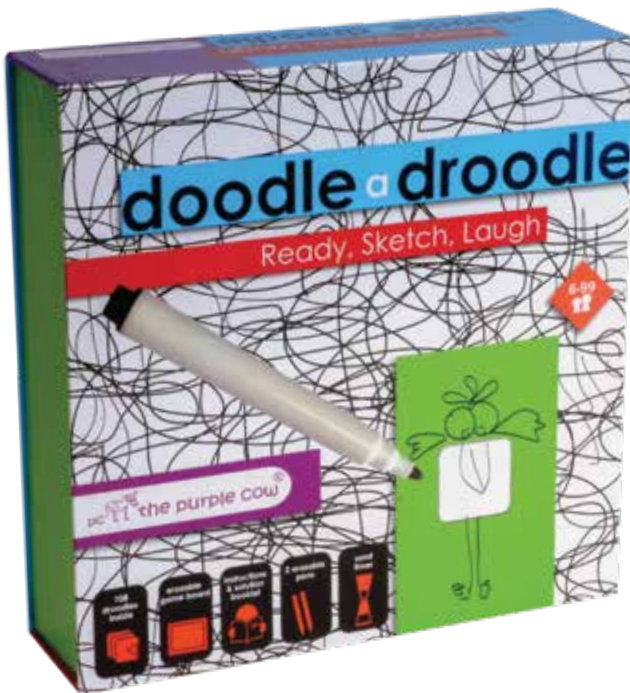

"The Purple Cow" brings the "Droodles" back to life with a twist! 3 different games that essentially focus on the same concept:

Players need to think creatively and sketch an interpretation of a droodle card. If they did a good job sketching, others can guess right and points are won.

A good laugh is guaranteed!

At home, when traveling or even playing solo!

**EINSTEIN**

## Why 'Einstein' ?

Einstein is considered the greatest scientist of the 20th century. His name is almost synonymous with the words 'Science' or 'Scientist'.

His iconic "tongue out" image represents an additional side of his playful character - a childish side full of humor and curiosity.

Einstein wasn't just a renowned scientist. His legacy as a great philosopher and educator feels equally important to his groundbreaking scientific revelations. His rich heritage of timeless quotes keeps surfacing and proves him a true visionary.

Living through the darkest times of the 20th century, his thoughts were progressive, modern and liberal, well ahead of his time, and are still very relevant to date.

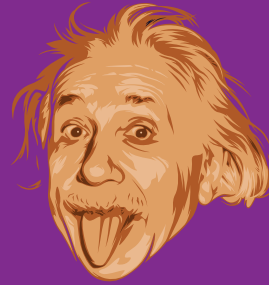

'Einstein' the perfect "STEAM ambassador" to promote and encourage STEAM PLAY for our children.

Albert Einstein.

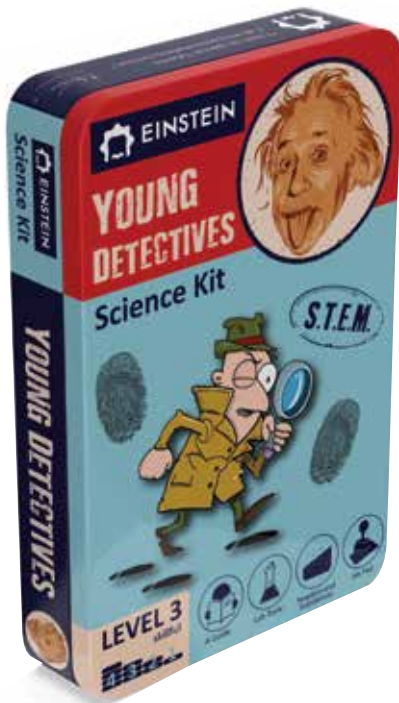

## The Einstein Science Lab

A range of 15 science kits in a carefully designed tin box to offer "a gifty" look. Each kit covers a scientific topic from a-z. Most kits have over a dozen experiments within.

Recycled Tin

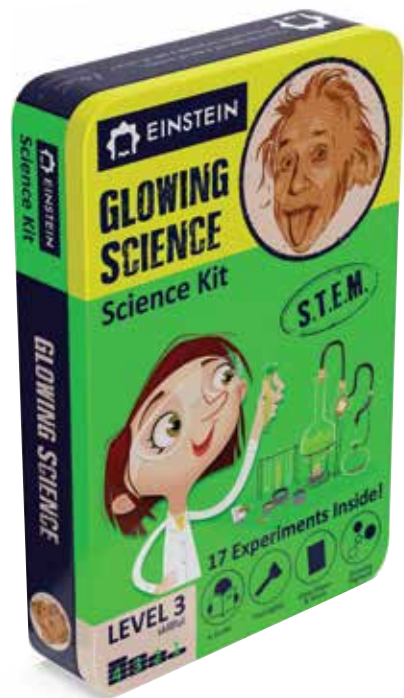

**Young Detectives**

Learn the science side of real crime scene investigations, Children will experiment with their own fingerprints. They'll learn how to extract fingerprints from various surfaces using different materials. They even create a 3D mold of their finger!

Item#: [6336](#)

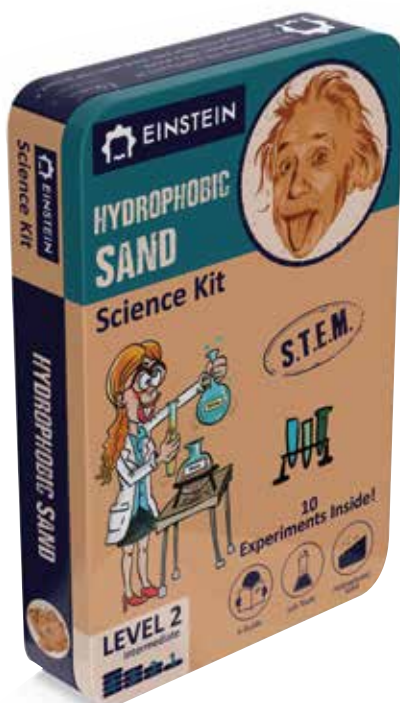

**Glowing Science**

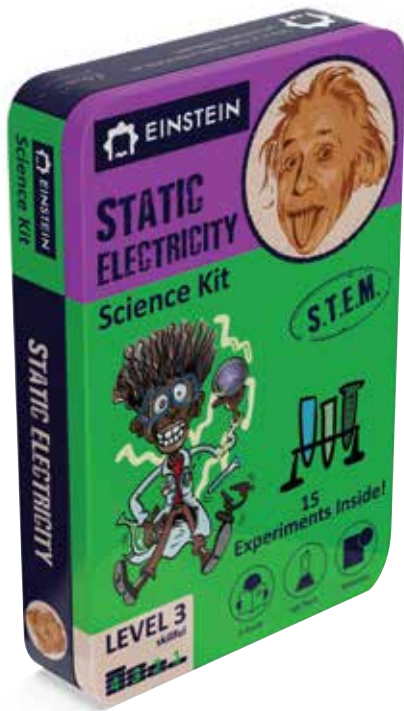

Glowing Science is a fascinating kit. Loaded with materials and 18 experiments - guaranteeing hours of FUN, STEM play and learn! Kids will create Glowing Water Gel Beads, Fluorescent Flowers, Glowing Soap Bubbles, Light Printing, Mobiles and much more!  
Barcode: 7290019486398  
Item#: [6398](#)

**Hydrophobic Sand**

It looks like ordinary sea sand and feels like ordinary sand - but it is anything but ordinary !!!  
In this kit we explore the fascinating scientific qualities of hydrophobic sand and its uses.  
We will compare it with regular sand and witness the amazing differences.  
Does it really stay dry when taken out from water?!  
How does it assist us in prevention of natural disasters?  
In a series of compelling experiments we will learn all there is to learn about the fascinating hydrophobic sand.

Item#: 6374

**Crazy Egg Science**

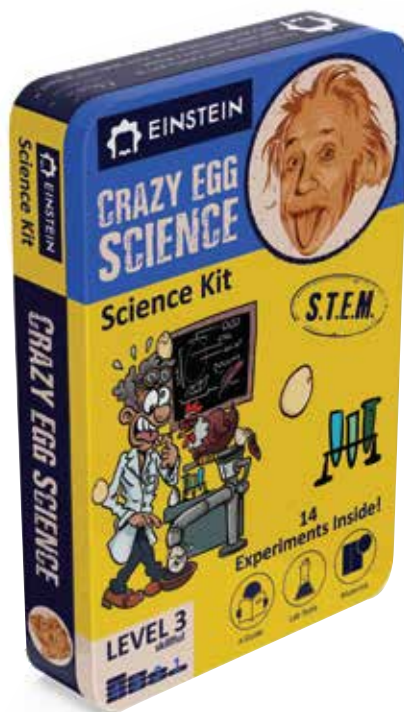

Ever thought about eggs from a science perspective?

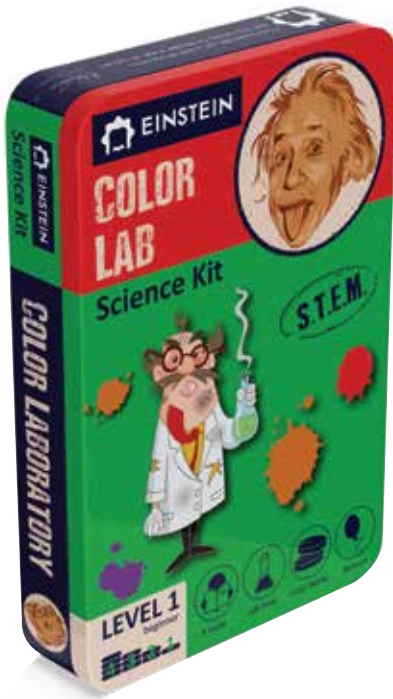

Sounds crazy doesn't it...

This kit includes an array of science tricks and cool experiments focusing on the spectacular world of eggs. Experiments include: witnessing an egg getting sucked into a bottle, an egg transforming into a bouncy ball, an optical illusion turning white eggs into silver, and many more!

Barcode: 7290019486435

Item#: 6435

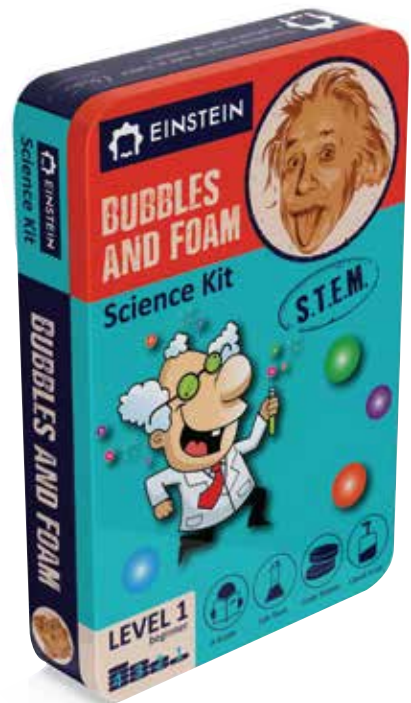

**Color Laboratory**

This kit focuses on colors. Children as young as 4 years old will experiment in creating an ice ball with colorful tunnels, creating color solutions and transforming and mixing colors, and even painting with colorful ice! Find all these and more in this kit.  
Barcode: 7290019486312  
Item#: [6312](#)

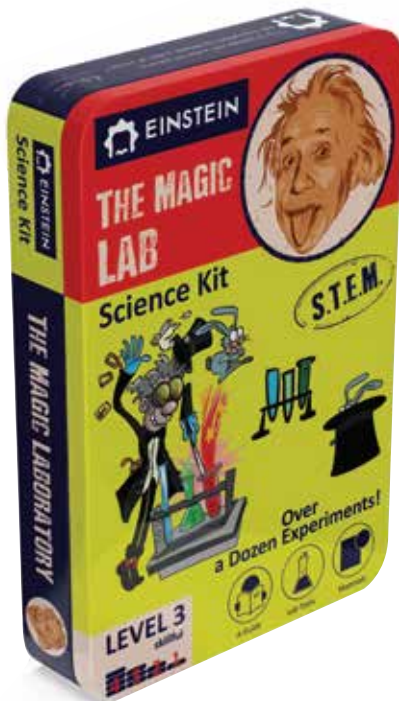

**Bubbles and Foam**

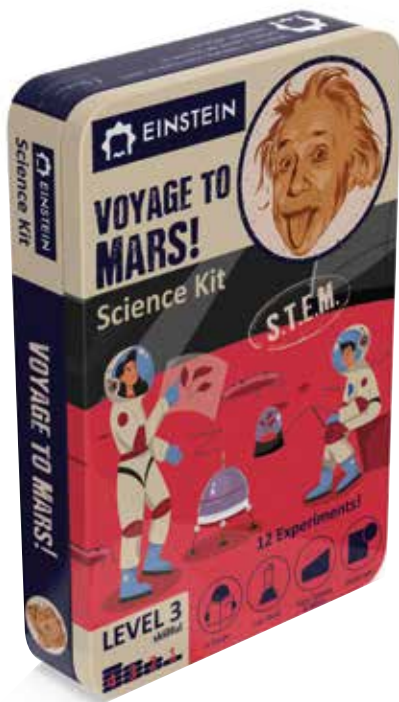

This kit focuses on water, colors, and bubbles, making science accessible to children as young as 4 years old! Children will create a soap membrane, a foam beehive, learn to hold a bubble without popping it, create colorful bubbles and even paint with colorful foam. Find all these and more in this kit.  
Barcode: 7290019486305  
Item#: [6305](#)

**The Magic Laboratory**

Ever wondered how magicians work their magic? Did you know that Science is often at the basis of these tricks? The young explorer will carry out real science experiments such as creating hot dry ice, playing with amazing optical illusions, writing secret messages using Teflon tape and many many more!  
Barcode: 7290019486428  
Item#: [6428](#)

**Voyage to Mars!**

Mars is the 4th closest planet to the Sun in our solar system. Mars is the closest to Earth of all the planets – even though the distance is huge. It has always intrigued and drew scientists' attention and curiosity. Let's discover together what is so special about Mars!

## The Einstein Science Stuff

Straight out of the laboratory, meet the newly "faced lifted" lab tube design of the Einstein's Science Stuff line.

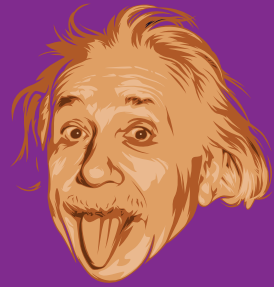

Each one of the 6 lab tubes contains a small treasure - one amazing science material with special qualities:

**Hydrophobic Sand** that can never get wet, **Glow in the Dark Putty** that will be fun to mess around with, even in dark moments, **Polymer Snow** that works also in warm weather, **Alum** to create funky crystals, **Magnetic Putty** - be mesmerized as it gobbles up coins, **Sand Slime** - a cool sandy version of the notorious slime addiction.

Each 'lab tube' comes with a "one pager" that explains about the material and suggests experiments that can be carried out.

Priced competitively as an impulse science kit, this line is bound to deliver STEM sales on a budget.

The popular former version is still available as well.
